

A survey conducted by Jenny Sampson (Farmer and concerned community member), Warramboo SA

I conducted a survey on Saturday 10th May 2014 at the Warramboo Community Club.

Central Eyre played against Wirrulla in Football and Netball on the day.

The survey comprised of three statements to which the responders gave their opinion by answering either *Agree*, *Undecided* or *Disagree*.

I asked each responder individually and they gave their response verbally, which I recorded on data sheets.

The total time spent on collecting the data was approximately 3 hours across the day and evening.

I told each responder that I was collecting people's responses so that I was better informed on how the community felt about proposed mining on EP.

I read the statements and recorded the responses without discussion, (though much discussion usually followed once the responses were recorded).

The three statements were derived from media articles:

1. The Proposed Iron Ore Mine at Warramboo Will Save Our Community
2. Farming and Mining can Co-exist
3. Lock the Gate to Invasive Mining on Arable Agricultural Land

Along with their response, I also recorded their residential postcode, gender and age group.

I have entered the data collected into tables and from that have generated graphs to better show how the community feels.
